1,000 Sq. Ft. Roof Area + 1" Rain = Approx. 600 Gallons

Package 1 - BASIC System

The Bushman Basic System includes a tank with inlet strainer and cover, outlets with threaded inserts and plugs (bulkhead fittings on larger tanks), and an overflow assembly with mosquito screen.

Package 2 - PREMIER System

The Bushman Connection Kit "Package Workbench" with step-by-step installation instructions can be ordered separately (Part Number, BCK0001). The BSLT130 Slimline tank requires a special kit (Part Number, BCK0002).

Package 3 - SIGNATURE System

The Bushman Connection Kit (Part Number BCK0001) and Bushman Pump Kit (Part Number BPK1225CXP1A01). Select pump cover color designation (XX) to match tank color.

Rainwater Harvesting and Water Storage Systems

Bushman rainwater harvesting and water storage systems are available with complete installation kits.
